PILLARS	75-100	Leading
	36-74	Progressing
	0-35	Starting the Journey
1. Company's Purpose and Business Model		
2. Risk Management of ESG Concerns		
3. Engagement with Management		
4. Engagement with Stakeholders		
5. Non-Financial Disclosures		
Overall Self-Assessment Result		

THE BOARD'S OVERSIGHT OF ESG STANDARDS

Understanding environmental, social and governance (ESG) information is becoming an increasingly important topic for the board. ESG oversight and performance is often viewed as a key pillar of effective organisational governance to promote long-term success. From climate change to customer's health, ESG matters should be embedded into the company's purpose, management and culture; and the board has a pivotal role in overseeing these matters.

This board-level tool is designed to help boards assess how effectively they understand and are incorporating in their respective role ESG-related practices. This multiple-choice questionnaire seeks to evaluate the level and effectiveness of the board's oversight of ESG considerations across five core pillars. It then provides a board Profile rating based on the results.
